

Quality By Design.

Bridge Inspection Services

With more bridges and overpasses across the nation approaching the end of their useful life, you should turn to proven experts to implement regular bridge and sign inspection programs. CHA's certified inspectors have inspected thousands of structures, identifying critical deficiencies and preventing problems before they happen.

-  System Inventories, Management & Planning
-  Program Design & Development
-  Bridge Inspection Software Development
-  Field Inspection with Full Traffic Control
-  Inventory & Load Rating Analysis
-  Structural & Fatigue Analysis
-  Scour Investigation & Remediation
-  Underwater Inspection

Bridge Design Services

Successful bridge projects combine the designer's eye for graceful forms with a clear understanding of economic realities. Clough Harbour & Associates LLP (CHA) has the necessary experience to create cost effective designs that blend creatively into the site's environment. Our experience includes a wide range of bridge types from stream culverts to major river crossings to moveable bridges.

- Bridge Rehabilitation Design
- Conceptual Design & Visualizations
- Type Size & Location Studies
- Preliminary & Final Design Development
- Retaining Wall Design
- Foundation Studies & Design
- Hydraulic Studies
- Historic Rehabilitation
